

New Wave Docks Ltd.

From Cottage to Marina, we have the float or dock system that will fit your needs.

In House Design • Steel & Aluminum Fabrication • Full Line of Accessories

From Start To Finish, We Design, Deliver And Install!!

New Wave Docks Ltd.

Since 1996, New Wave Docks has been building quality floating dock structures. In 2000, we purchased a Rotational Molding Machine to manufacture plastic products. This method allows us the freedom to mold a wide range of products, while ensuring 100% quality control. Each float is designed for easy assembly and the flexibility to create an unlimited variety of useful configurations. Everything from hinges and floats to fully built structures have been combined under one roof. Our accessories, kits and built structures allow our customers to own a quality dock system suited to their personal needs, at a reasonable price. All floats are backed by a limited manufacturers warranty.

Ride the Waves

Installations

Marinas + Aquaculture + Heli-pads + Cottages
Barges + Swimming Enclosures

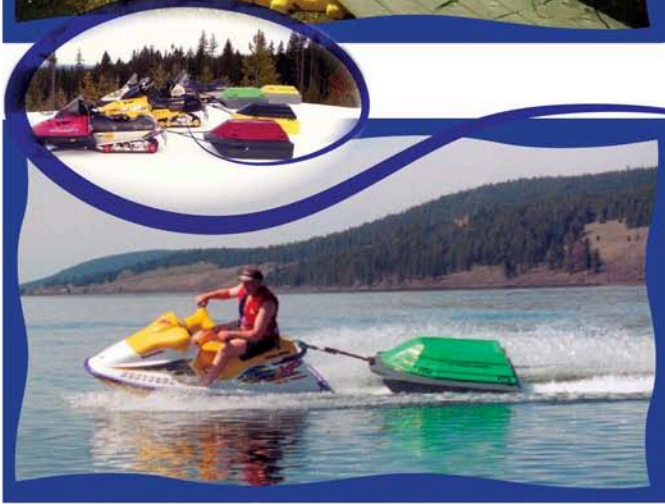

Other Applications

Temporary Road Mats
Modular Docks + Trackers

We rotationally mold a seamless polyethylene float, with a consistent wall thickness of 5/16". This ensures strength and durability against punctures and splits.

- 1 1/2" drain plug for pump out or ballast.
- 3/8" T-nuts for attachment of bottom skid plates.
- 4" flanges ensuring proper attachment to framing are placed for maximum application.

Nose Cones are available for all float systems and structures.

NW 450

Nose Cone

- 24" x 48" x 14"
- 450 lbs of floatation
- 41 lbs Dry Weight

Construction ranging from 2" x 6" to 4" x 12" depending on application.

NW 1000

- W 46" x L 58" x H 16"
- 1000 lbs of floatation
- 84 lbs Dry Weight

NW 1400

- W 46" x L 58" x H 20"
- 1400 lbs of floatation
- 91 lbs Dry Weight

Nose Cone

- The NW 1900 with Nose Cone

- W 33" x L 68" x H 30"
